

THE EXSILIO BUSINESS PERFORMANCE PROCESS

Exsilio solves business challenges by designing procedures and structures to support and enhance your work. Our team builds solutions to help your business be more efficient, more competitive, and more profitable.

DISCOVERY, ARCHITECTURE & PLANNING

01

We work diligently to fully understand your organization's business drivers, strategies, goals, and objectives. Each of our custom solutions is specifically designed to solve your unique business challenges. We work with your teams to set appropriate key performance indicators to increase buy-in from those responsible for meeting performance goals.

DATA MINING & WAREHOUSING

02

The quality and availability, as well as the effort needed to process and transform data, varies across different systems. Molding heterogeneous systems into a form suitable for data mining is a key factor for success. Exsilio's analysts and system architects work together to migrate and merge disparate data warehouses to guarantee solution performance and reliability.

BUSINESS INTELLIGENCE, REPORTING & MOBILITY

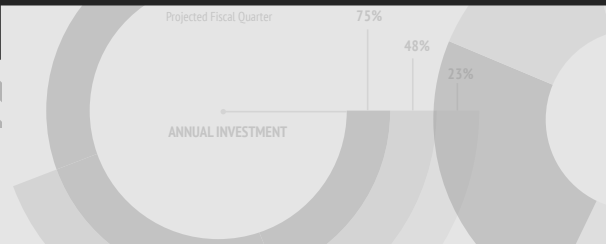

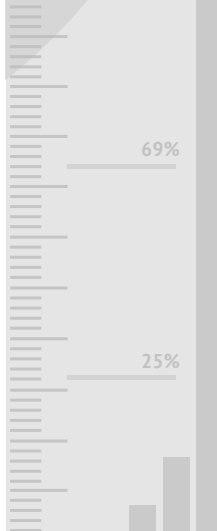

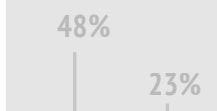

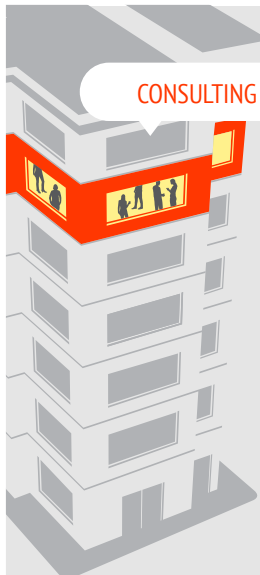

03

Business Intelligence (BI) gives organizations a detailed picture of what is going on inside their business. BI solutions illustrate performance at a granular level by referencing real-time data against project goals. Exsilio's business analysts and development experts evaluate your specific needs and create custom applications for accessing your data when and where users need it.

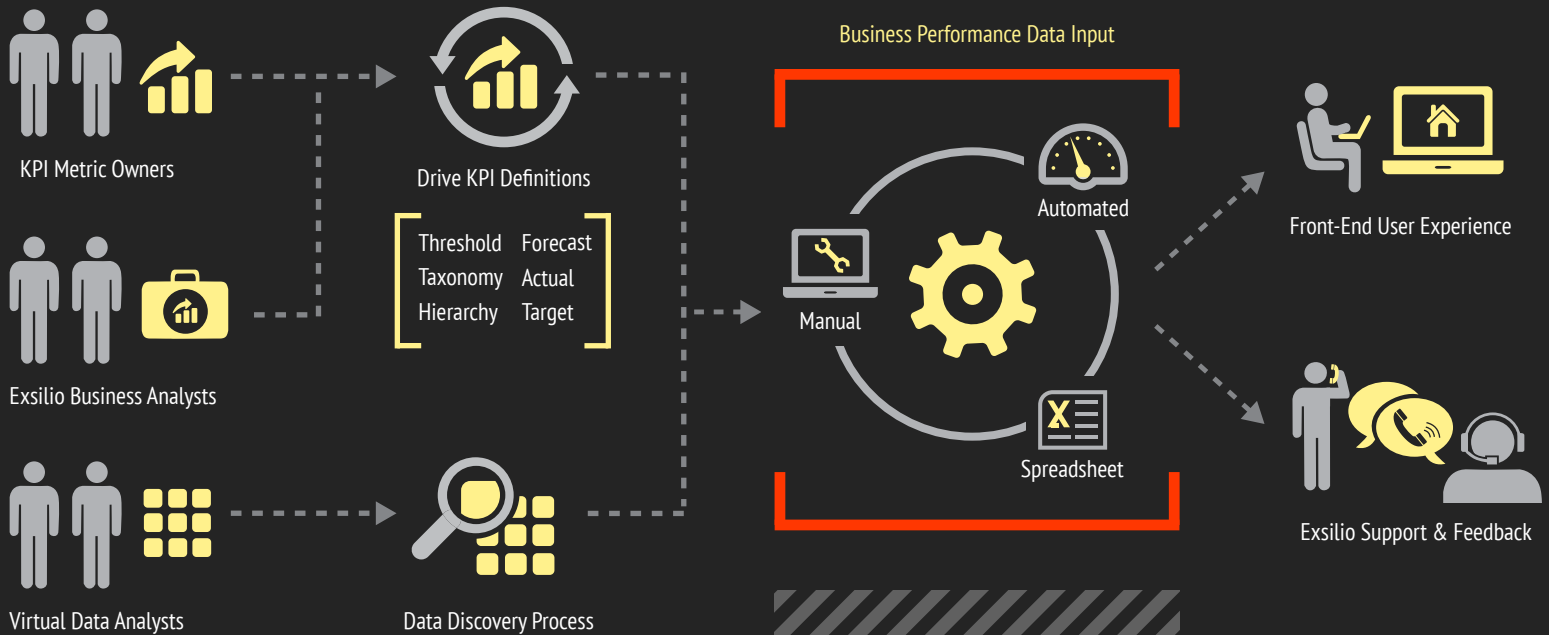

SOLUTIONS DEPLOYMENT, TRAINING & SUPPORT

04

A system is only as effective as its users are knowledgeable about operating it. Thoroughly planned deployment, on-boarding, and training are crucial for end-users. Exsilio's business management team provides educational processes and guidelines for your users, enabling them to effectively and efficiently utilize information available in your new system.

BUSINESS PERFORMANCE CHART

Exsilio connects the dots between strategy and execution. We help organizations build measurement systems that bridge the gap by tracking and analyzing operational information.

PROCESS BLUEPRINT

Exsilio helps organizations improve their competitive advantage through business process improvement and business intelligence services. Successful engagements are the result of our ability to assist in developing the right solutions to meet our clients' needs. Exsilio's solutions are practical, cost-effective, and rapidly implemented.
